INDUSTRIAL CHAINLINK FENCES

MONO Fence Industrial chainlink fence fabrics are designed for the toughest environments for the industrial usage.

Steel Wire with a 9 GA is the standard gauge for most projects. Heavier and lighter gauge options are available depending on the project requirements. A heavier 6 gauge is used for many sports applications such as backstops and batting cages or a high security application for the prisons.

COMMERCIAL CHAINLINK FENCES

It is much safer to protect your commercial properties with

MONO Fence chain fence fabrics. Our fast and reliable team is here to ensure you get exactly what you want on time.

Our commercial chainlink fence fabrics, which are produced for your project needs, can be produced by us in a short time by using different textures and materials according to your usage areas.

The most common commercial chain fabrics are made from 9GA and 11GA galvanized coated ASTM standard wires with mesh sizes from 1" to 2 3/8".

Measuring Mesh Size

Selvage: Knuckle

Selvage: Twist

RESIDENTIAL CHAINLINK FENCES

MONO Fence offers a large variety of chain link fencing products.. When decide for your fencing needs, be sure that when you compare prices you are comparing the same quality of products. There are several gauges of wires for the residential usage, 9GA, 11GA and 11.5GA, the higher the gauge number, the thinner the wire.

The most common mesh opening is a 2", meaning the "holes" in the wire are 2" square. Other mesh sizes range from 1" to 2 3/8". We have all fence wire available in different gauges.

Your MONO Fence representative will assist you to make the right decision for your needs.

VINYL COATED CHAINLINK FENCES

MONO Fence vinyl coating is an upgrade to the traditional chain link fence design. Each wire or the entire woven fence is coated in soft yet durable vinyl. The coating protects both the fence metal and any person or object that comes into contact with the fence, clothing can catch and the fence can even cause significant scratches when barbs or rough finish scrape across. A vinyl chain link fence is protected from these issues because vinyl never becomes rough. Small breaks in the fence are less likely to happen (or to be cut) because the vinyl protects the wire links.

The vinyl either acts as a finish or protects the finish of the chain linking inside. This means that no matter how old a vinyl chain link fence gets, it is will have no barbs and will never snag clothing, skin, or packaging when touched.

SPECIAL SIZES

Mono Fence can capable to manufacturespecial sizes of chainlink fabric depending to the project and customer need please contact us for more information.
