WIRES

GALVANIZED WIRE

Hot dip galvanized wires are produced precisely according to customer demands. The processes that galvanized wires go through steps of annealing, acid-f lux pickling and molten zinc plating. The biggest advantages of our galvanized wires are their resistance to rust and long service life. Hot dip galvanized wires are mostly used in producing; barbed wire, wire mesh, panel fence, pvc coated wire, hanger wire and etc.

HIGH TENSILE WIRE

Galvanized high tensile wire features a single-strand design that allows it to be used for pasture fencing, tying, or bundling. Offered in coils chose the coating option that matches your needs of coating coating for added durability and longevity in all types of environmental and operational conditions.

Designed for general fencing jobs, temporary fencing needs and cost-efficient fencing, our high tensile smooth wire allows for increased post spacing with low maintenance.

VINE YARD AND TRELLIS WIRE

Vineyard and trellis wire is produced in a variety of gauge sizes, coating weights and packages, depending on what is needed for the particular vineyard or trellis system.

Mono Fence keeps in mind that there are as many different types of wire and trellis system as there are vineyards and growers, and we are able to supply what ever vineyard wire type that is requested.

Most commonly requested vineyard wire on the West Coast is continuous wire that is delivered on wire carriers containing 1,500 to 2,000 pounds of wire.

The gauges of wire most generally used are, 14, 13, 12, 11 and 10 gauges with a Class I zinc coating.

BARBED WIRE

Mono Fence galvanized barbed wire is a perfect product for challenging conditions with its flawless coating, deterring barbs and a long service life.

Depending to its durable structure, the product can be used in wide areas with very little support and provide significant cost efficiency.
